

**Circle Map for Defining in Context**

## Solids Circle Map Instructions

On the blank paper provided, you are going to construct a circle map that shows information about solid materials. Include the following criteria:

- A circle that takes up the entire space. In the center circle are the words "Qualities of a Solid".
- Around the center circle you will name and draw **5 examples** of a solid material. Stick people or objects are not acceptable. **Color** them neatly!
- Include **5 facts** about solids. These facts can be how we test solids and/or what properties (chemical or physical) they possess. Neatly **draw and color** a picture to correspond to each fact.
- Neatness
- Creativity
- Your best effort!
- Due tomorrow
